About Me

Passionate Full-Stack MERN Developer with a strong foundation in Data Structures and Algorithms (Java). Experienced in building scalable, interactive web applications with a focus on responsive design and efficient frontend architecture. Committed to continuous learning and solving complex technical challenges.

Education

Bachelor of Technology in Computer Science, IES IPS Academy, Indore

- **Current SPGA:** 7.4 (Average across semesters)
- **Graduation:** 2026

Skills

- **Programming:** Java, JavaScript
- **Web Technologies:** HTML, CSS, Bootstrap
- **Core Subjects:** DSA, OOPS, DBMS
- **Backend Development :** Node.js, Express.js, MongoDB.

Experience

Intern - Amstech Incorporation Pvt Ltd, Indore (Apr 2025 - Oct 2025)

- Transitioned from frontend to backend development, contributing production-ready Java code and database integrations.
- Designed and implemented optimized responsive UIs, improving usability and accessibility.
- Enhanced system performance by writing efficient database queries and fixing critical bugs.
- Actively participated in code reviews, improving UI/UX and boosting user engagement.

Projects

University Management Interface

- Engineered a fully responsive multi-page frontend featuring a scroll-aware navigation system for enhanced user experience.
- Architected modular, reusable components (Courses, Testimonials, Contact) to ensure code maintainability and scalability.
- Leveraged React Hooks (useState, useEffect) to manage dynamic states and side effects efficiently.
- Streamlined deployment using a CI/CD pipeline via GitHub and Vercel.
